

the choice is yours
alisun **V300+**

the choice is yours

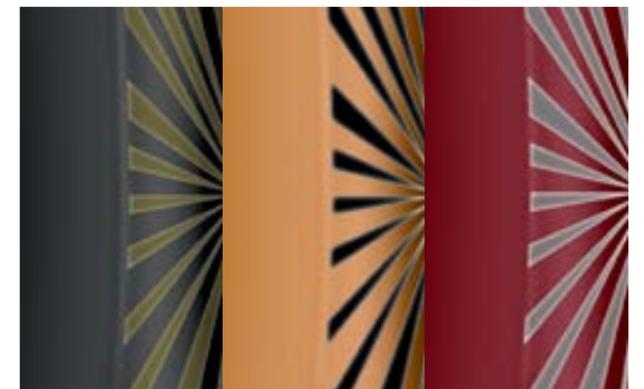

Alisun was one of the pioneers in the tanning industry some 25 years ago and has been one of the leading brands ever since. We were the pioneer when it comes to vertical tanning and we have kept a world leading position with a wide range of the best price performance vertical tanning units. Now we are further strengthening our position with an even broader range of vertical tanning units for literally all possible applications whether it's a high end tanning studio or a side business for a beautician.

All V300+ come standard with an unique cooling system

Silent fan system

The V300+

The Alisun V300+ is one of the best sold vertical units on the market and is today sold literally everywhere. The V300+ comes now in versions from 160 W low pressure lamps to the new V300+/180 with 180W low pressure lamps and two specially developed HP facial enforcements. This makes the V300+ unique.

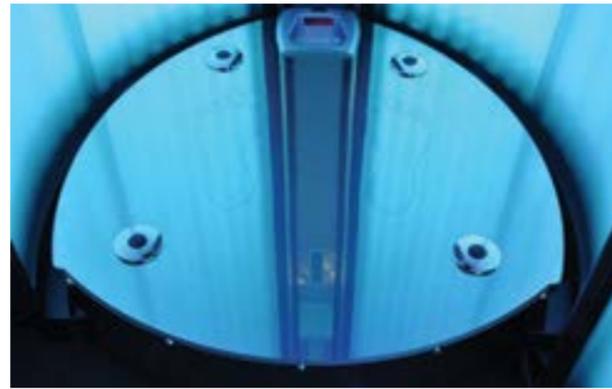

Also, the fact that V300+ offers lamp alternatives and combinations from pure UV, Tan Beauty anti-aging to pure collagen in combination with your choice of high pressure facials. Our specially developed lamps, high pressure filters and lamps ensure the optimal tanning experience in all markets and regulations.

To add to the uniqueness of the V300+ range you can fit the Perfect Shape vibration plate for training while you tan and you can also combine the V300+ with the Space Saver changing booth. The best of all is that all of this comes at an affordable price!

Plug in your MP3 player and listen to your favourite music

Offer additional fitness with the optional Perfect Shape

User friendly control panel comes standard with the V300+

Adjustable cooling

High quality materials are found in every single detail

High pressure lamp

The V300+ can as an option be equipped with two 200W specially designed high pressure lamps. The design makes it easy to change the filter and we offer options with UV, Tan Beauty anti-aging lamps, and pure collagen, or any combination at your choice.

180 W lamps

V300+ comes in 160W and 180W versions. The 160W is perfect when you have a limited power supply.

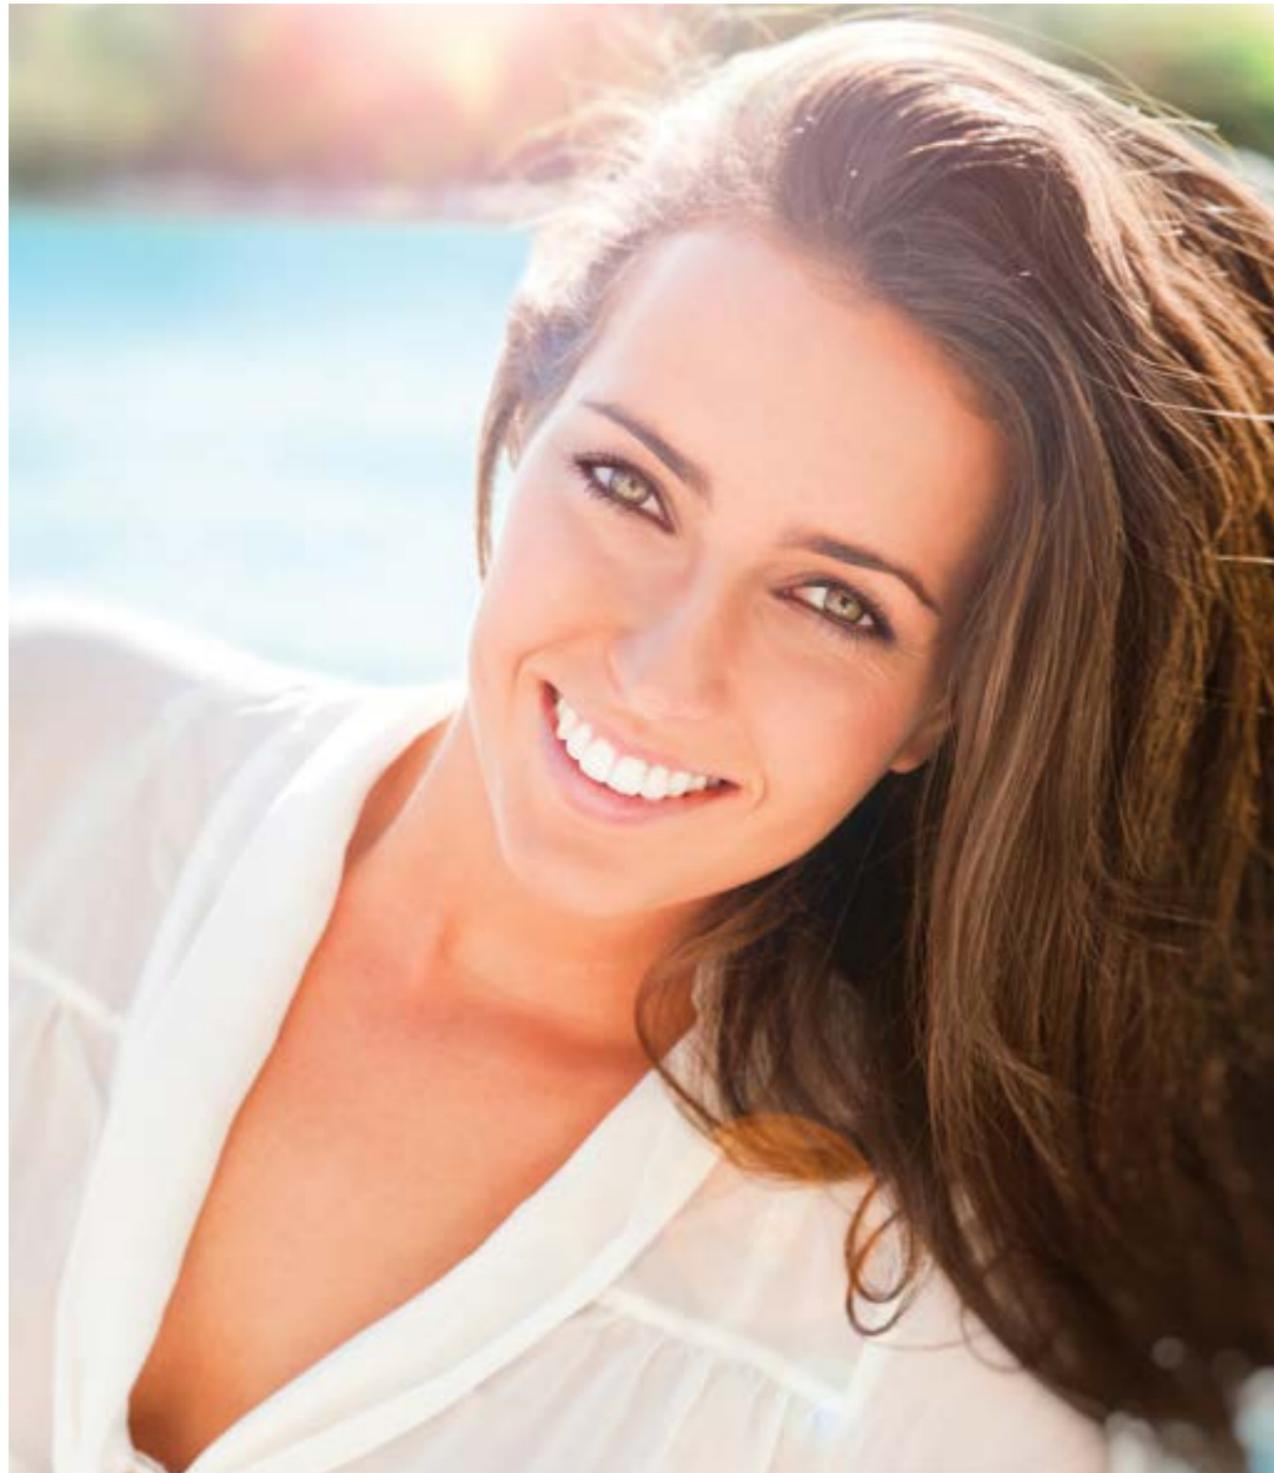

Space Saver gives you maximum freedom and enables you to fit the V300+ in any environment without adding cost for building special tanning rooms.

Perfect shape

Your V300+ can easily be fitted with the Perfect Shape vibration body shaper with a wide variety of programs. When using the Perfect Shape during a tanning session it will substantially increase the tanning effect.

Lamps

The Alisun V300+ comes in a 160W or 180W version and as an option you can choose to have it fitted with two specially designed 200W high pressure face tanners. You can fit your V300+ with Alisun Bright Performance UV lamps and filters, Sun2 T7 Tan Beauty anti-aging and vitamin D lamps and filters or Sun2 T7 Pure Beauty Collagen. Or you can fit the unit with any combination of low- and high pressure lamps and filters – the choice is yours!

Optional 200W specially designed high pressure lamps

Tan Beauty provides an unique UV - Collagen combination in one lamp

Combine the V300+ UV lamps with our special Pure Beauty Collagen lamps

Tan Beauty

Sun2 T7 Tan Beauty is a series of newly developed fluorescent lamps that have unique anti-aging properties. This new technology combines a perfect summer tanning with an effective anti-age and skin-collagen treatment and vitamin D production in one single lamp. In Tan Beauty fluorescent lamps we have greatly improved the balance by lowering the UVA and increased UVB. Thus, a better pigmentation and a more durable, smoother and better looking tan.

Solagen

By combining every other UV lamp with a special Collagen lamp Solagen truly offers best of both worlds. Connective tissue is our body's network. It consists of cells and the extra cellular matrix (ECM). This last consists mostly of collagen (structural proteins), fibers which give shape and elasticity, non-collagenous proteins, basicsubstance and water. Connective tissue is interlaced in a net-like manner and serves as an elastic membrane and supporting tissue between cells, organs, parts of organs and in the skin, bones, blood vessel walls, cartilage, tendons and ligaments!
